Summary of Information

The target is an area where there is a hard/soft interface; either 1) there is a water/sand interface or 2) there is a soft soil/hard soil (e.g., sand dunes/exposed sandstone) interface. It is warm and there is the concept of containment (e.g., a channeled or directing force) present.

There are sharply curved objects which are set upright, or on edge, into a surface. An old man is present. He is dressed in red sweat pants, a blue stocking hat and has old clothing on over his upper body. He has glasses and graying hair. He is sitting on an angled seat reminiscent of a bench and is leaning forward, intently viewing some busy or organized activity. Another individual is sitting and reading. He is also elderly, has a "light hearted" attitude towards his life and "enjoys little things".

There are a number of girls dressed in identical plaid skirts who are meeting together for a common activity. They are associated with "school".

There is an area of countless parallel lines associated with a cutting and alignment activity. There are clunking and clamping also associated with this activity.

There is a crack or a tear between something in the background. It is reminiscent of the sun peeking between the clouds and the earth's horizon at sunset. This aspect of the target is cold. A small object is swinging or is suspended (see diagram i(a)).

FOOTNOTE:

Early in the session, someone or something asked me if I wanted a "peek" of the future. My reply was "I don't want to see the future...You are not from the light...You are the Seducer(?)". A few moments later I had the sensation of being trapped in a vehicle while it (and I) were being compressed in a car compactor (like the ones you see in an auto junk yard).
